EDUCATION

Belarusian State University
Faculty of Applied Mathematics and Computer Science
Specialty: Applied Mathematics

PERSONAL PROFILE

Student at Belarusian State University (FAMCS), Applied Mathematics and Informatics. Python/Java developer with strong foundation in algorithms and object-oriented programming. I am engaged in additional English language studies.

SKILLS

- Python
- C++ (OOP, QT)
- Java (OOP)
- Git, GitHub, Algorithm
- HTML + CSS (layout)
- Mathematical problem-solving skills

PROJECTS

- Operating system - Colloquium 2 (Python). Developed a REST API service simulating OS workflows.
- Industrial Programming. Developed a Java console application simulating a washing machine factory. Used Builder and Decorator patterns, collections, and exception handling.
- Summer practice - Game "Dots" Project (Python). Developed a graphical "Dots" game with an interactive user interface, including menus and gameplay. Applied object-oriented programming principles and a modular architecture to ensure a clear interface and smooth user experience.
